Allowable Subject Matter

1. Claims 1-3 and 5-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record neither anticipates, nor renders obvious, a machine for the chip-forming machining of gears and screw-type workpieces as claimed in independent claims 1, 19 and 20, specifically wherein at least two of the functional units are arranged displaceable relative to the swivel head (claim 1); the functional units are arranged radially displaceable relative to the swivel head (claim 19); or wherein at least one of the functional units is displaceable parallel to the swivel axis of the swivel head and wherein the functional units displaceable parallel to the swivel axis are arranged on infeed slides, which are arranged inside the swivel head (claim 20).

The closest prior art is U.S. Pat. No. 4,584,794 (Hirohata) as is discussed in detail in the previous office action.

Hirohata teaches the central point of the grindstones B always remains at the same place on the bearing 20 and each grindstone B only rotates around its own axis.

Hirohata does not teach the displacement of the functional units as claimed.

Therefore Hirohata does not anticipate the claimed invention of independent claims 1, 19 or 20.

Furthermore, there is no prior art that would render obvious the claimed invention, either alone or in combination with Hirohata, and no motivation found to modify Hirohata to obtain the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
